

New!

Solid Teflon Sealing Ring Sizing Tool for: ZF4HP22-24 Input Shaft

AZ#724

MODEL NO. AZ724

- ◆ Quickly size the solid Teflon rings on ZF4HP22-24 Input Shaft.
- ◆ All metal construction for long life.
- ◆ Stop using hose clamps to size solid Teflon sealing rings.
- ◆ E-Z to use. Fully illustrated instructions included.
- ◆ All parts made in U.S.A.

NOTE: Please read and follow all instructions before first using this tool

E-Z To Use:

1. After removing the scarf cut rings. Slide teflon ring down past the first groove into the lowest groove

DO NOT OVER STRETCH RINGS!

2. Slide the second ring down the shaft into the top groove.

Make sure the rings have not rolled. Check alignment of ring before proceeding.

Lubricate the rings and inside of tool With Trans. fluid or Trans-gel.

3. Slide the sizing tool over the shaft leading with the one groove end of tool as shown.

Slide down until tool bottoms on shaft.

Remove sizer from shaft.

4. Turn tool over and lead with the two groove end of the tool until it bottoms on the shaft.

5. Slide shaft into position with mating part.
